## **News Summary**

CLEARWATER, Fla. – May 30, 2009 – NDS Systems, a leading provider of enterprise-class ERP solutions designed for small- and mid-sized businesses, today announced a new partnership with Everest Business Solutions (E2SCorp). E2SCorp specializes in IT professional consulting services for business Process re-engineering focusing on manufacturing industries. Together, NDS and E2SCorp expect to help NDS customers to improve operational efficiencies and lower costs by obtaining an expanded set of new services.

## **New Services Being Offered**

- Customized solutions for end-to-end engineering product/manufacturing companies with flexible delivery model. E2SCorp's expertise includes team of manufacturing SME's and Domain experts with strong process knowledge in engineering.
- ERP services customized to Manufacturing process and Execution Systems (MPES). MPES is to integrate information flow across inter-departmental chain of operations such as purchasing, engineering, finance, labor and quality, compliance and regulatory testing and management. Client ROI includes critical benefits in quality, productivity, continuous process improvements and improving bottom-lines.
- IT Engineering services cater to CAD/ CAM representations for engineering manufacturing components as well as quality assurance documents can all be controlled by an MPES document control systems.

“NDS has a long reputation for high quality products and excellent services. It was critical for us to find a partner who shares those values,” stated Don Voelkert, President of NDS. “We expect this partnership to be highly beneficial to our customers, who can expect to lower their costs and raise the effectiveness of their ERP solutions through better operational efficiencies.”

“E2SCorp believes that the knowledge and understanding of a client’s industry is as important as in-depth technology expertise,” stated Michael Kiely, Executive Director at Everest Business Solutions. “We are pleased to add our subject matter expertise in manufacturing and other areas to enhance the benefits that NDS customers can expect to receive from adopting ERP solutions to support their business.”

## **Availability**

These new services offerings are available immediately to NDS customers. For additional details and information, organizations can contact NDS:
